

PROJECT OVERVIEW

JUNE 2023

US 18 (Bluemound Road) Project to Begin

The Wisconsin Department of Transportation (WisDOT) is scheduled to resurface US 18 (Bluemound Road) in Waukesha County from I-94 to the east Waukesha County line (roughly 124th Street).

The project, which will be completed in two phases, will begin in early July, continue through fall 2023, resume in spring 2024, and is scheduled to be completed by fall 2024.

The project will rehabilitate the roadway's deteriorating pavement, extending its service life and improving ride quality. The project will also address outdated traffic signal equipment in select locations. The project will not modify access or median openings.

Access to businesses and residences will be maintained throughout the project. Temporary driveway closures may be necessary for short periods, and the contractor will contact property owners before closing a driveway.

Proposed Improvements

- Resurfacing pavement by milling the existing asphalt, base-patching the underlying concrete pavement, as needed, and overlaying with new asphalt.
- Replacing existing traffic signals with new monotube signal poles at the Bluemound Road intersections with Underwood Crossing Parkway and 124th Street.
- Replacing pedestrian accommodations that are in disrepair or that do not comply with current federal accessibility standards.

PHASE 1

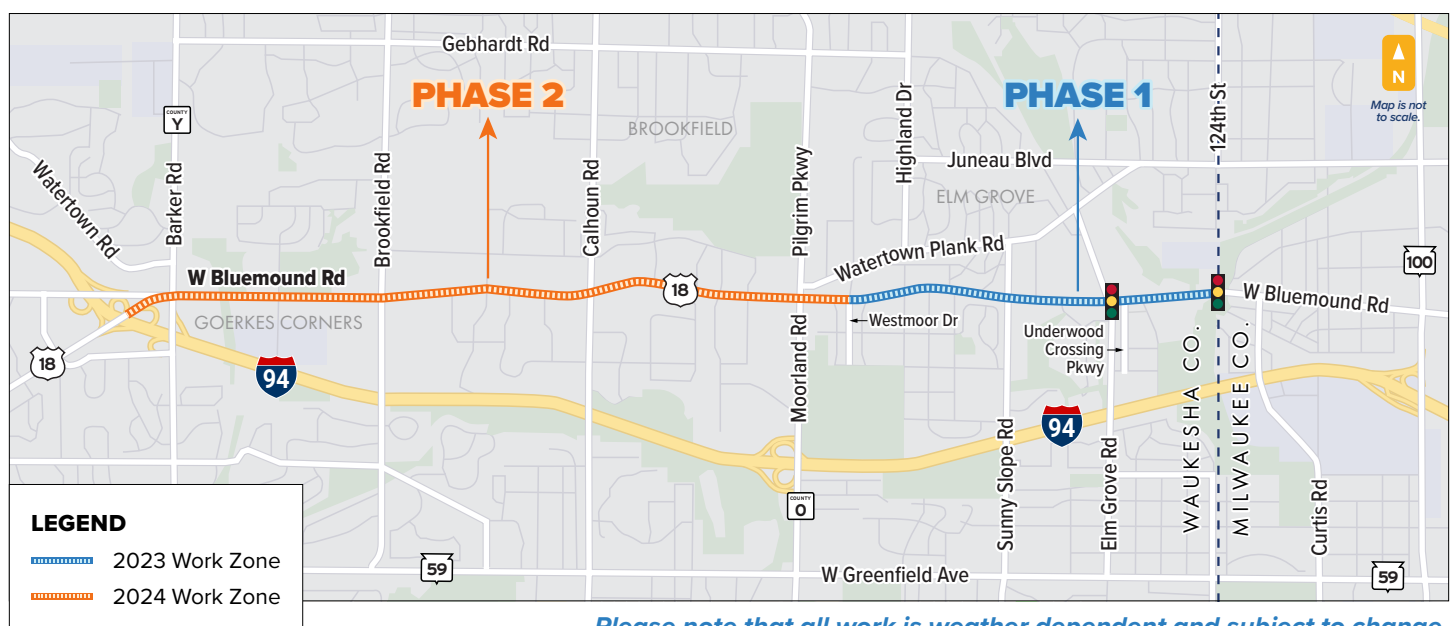

2023 Construction

- Construction from east of Moorland Road to the east Waukesha County line is scheduled from early July to fall 2023.
- The project typically will maintain the existing two lanes of traffic in each direction during the day, reducing to one lane during evening and early morning hours. Reduction to one lane may extend into daytime hours for up to three weeks during pavement repairs and paving work.

PHASE 2

2024 Construction

- Construction from I-94 to east of Moorland Road is scheduled to resume in spring 2024 and be completed in fall 2024.

The project team thanks you for your patience and cooperation throughout this project!
